

Brio Leisure – Environmental Policy Statement

Brio Leisure is committed to delivering its services in an environmentally responsible manner and reducing the impact of its operations on the environment. This commitment covers all aspects of the operation and is aligned to Cheshire West and Chester Council's sustainability plans.

Brio Leisure will identify the environmental impacts of its operation and strive for continuous improvement by setting clear targets and monitoring progress toward objectives.

This will be delivered by

- Managing energy consumption by monitoring usage and implementing carbon reducing technologies.
- Identifying all legal requirements and ensuring compliance and industry best practice where possible.
- Creating a culture of environmental responsibility at all levels within the company through training, information and feedback on performance.
- Working with suppliers and customers to encourage positive environmental standards.
- Encouraging and facilitating sustainable travel to and from our facilities and services for staff and customers.
- Purchasing responsibly by controlling use of chemicals, working with local suppliers and focussing on recycled and non-toxic products.
- Minimising waste and increasing recycling rates across all services and facilities.
- Preventing pollution by controlling noise and emissions to the environment.

Brio Leisure will ensure that this policy is delivered by implementing an Environmental Strategy and ensuring regular reviews by senior management.

The policy statement is available to all employees and publicly displayed in centres and on the company website.
